

Losing a tooth

When

we are

babies

we

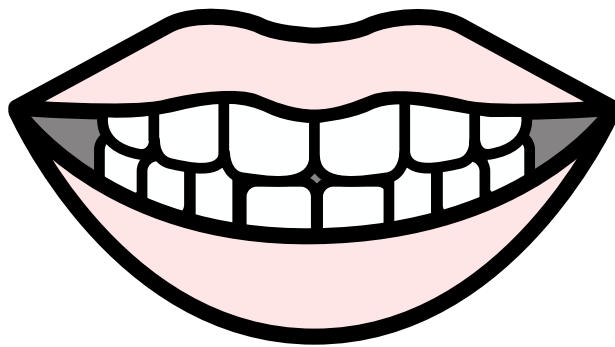

grow

baby

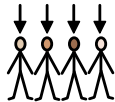

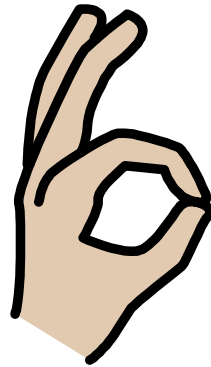

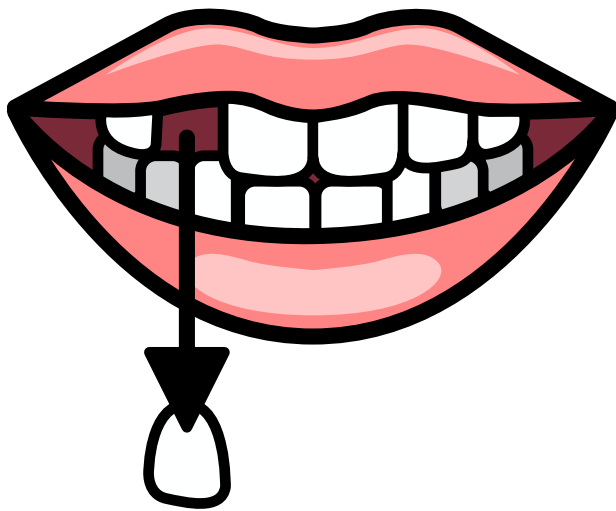

teeth.

As we  grow up we  grow adult  teeth.

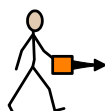

The  baby  teeth  fall out to make  space for the  adult  teeth.

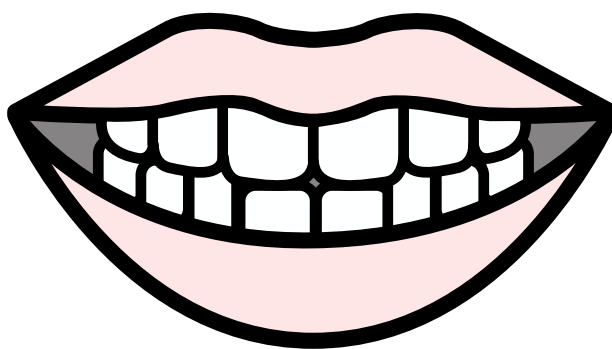

This is ok. Everyone loses baby teeth.

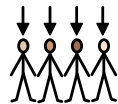

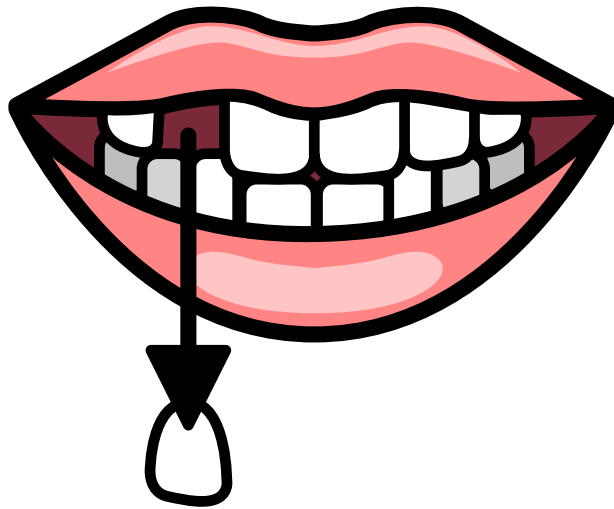

The tooth will grow back. It will be an adult tooth.

It might take a long time for the tooth to grow.

This is ok. The tooth is coming back.

Everyone

loses

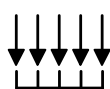

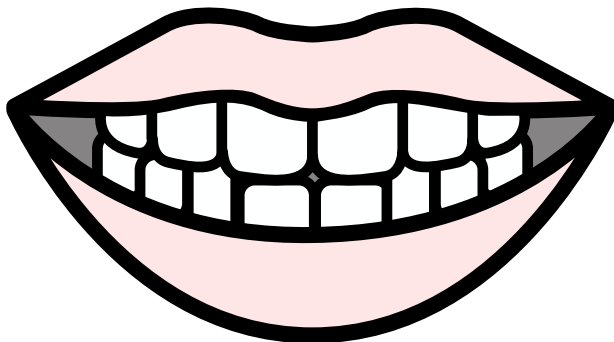

their

baby

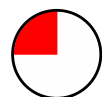

teeth.

It is

all

part of

growing up.
