

Going for a hearing test

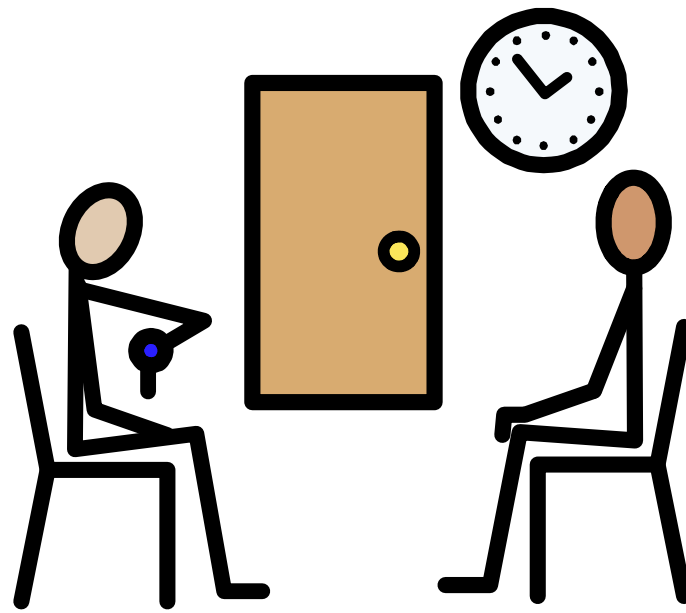

Soon I will get my hearing tested.

Our ears help us to hear.

Mummy will come with me to my hearing test.

 When I get to the appointment
 

 I might have to wait.

 When it is my turn I will walk to the
 

 audiologists room.

The audiologist might want to look in my ears with a special tool

called an otoscope.

I might have to wear some headphones and listen for a sound.

The headphones may have wires. It is okay. The wires help sound to

come through.

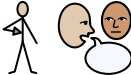

Some sounds will be loud. Some will be quiet.

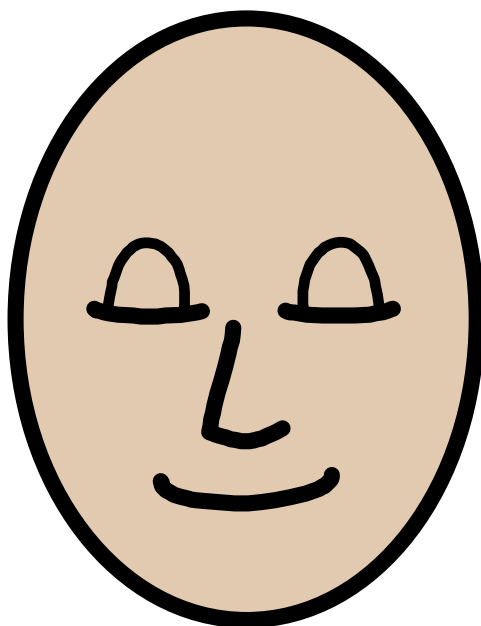

I will try to keep quiet so I can hear them.

   
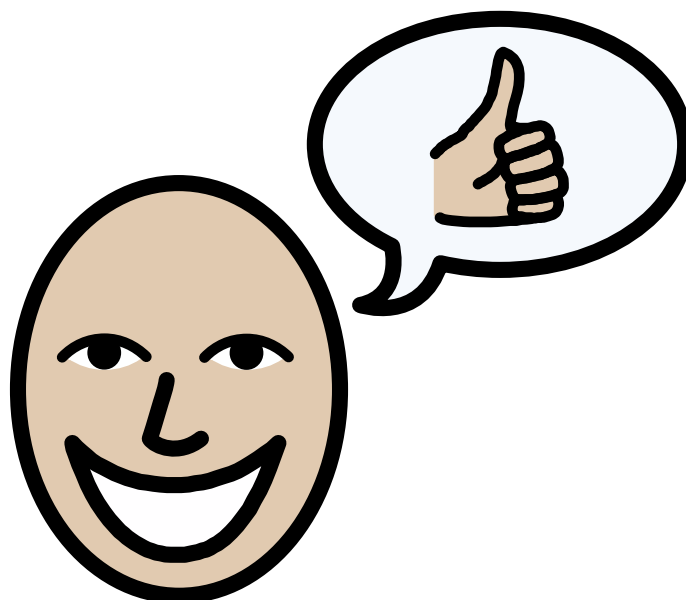

If I hear a sound I tell the audiologist.

      
The audiologist will tell me when we are finished.

I will try to remember to stay calm.

Well Done
